Paul,

During our conference call concerning OU2 today, we discussed the status of the Materials Management Plan, and MDNR indicated that it probably will have its comments to us by tomorrow afternoon. I mentioned that we have the Coal Combustion Byproduct (CCB) radionuclide analytical results back, and we discussed whether we should forward it to Dan. We agreed that you should forward the analytical results to Dan and MDNR (Shawn Muenks, Eric Gilstrap, and Darrick Steen). Also, please explain how we anticipate using the CCB (as fill to achieve grade, to fill the voids in the armor layer, etc., but not as a component of the final cover).

Would you forward the radionuclide analytical results to them? Thanks.

Mike
